

hm101**design: Massimo Mariani**

Massimo Mariani's hm101 bench system offers simple and practical seating solutions for public spaces, receptions, educational and healthcare environments. The asymmetric arrangement of the upholstered panels and laminate tabletops allows any number of benches to be interlinked, permitting creative and interesting combinations.

Frames are fsc-sourced birch ply with cmhr foam upholstery mounted on a steel underframe. Steel legs are painted white-grey with grey nylon feet. Table tops are white laminate with dark grey edging.
